IPC powder coating to the trade...

Industrial Plastic Coating (IPC) – provides a fast, efficient and highly flexible service for trade customers, delivering high quality, cost effective coatings when you need them.

IPC supplies a wide range of industry sectors including metal fabricators, furniture makers, display producers, automotive component

companies, engineering companies and consumer goods manufacturers.

We put durable, cost effective powder coating on a variety of metals in a wide range of coatings including epoxy, epoxy-polyester, polyester and PPA.

We can handle any shape or size up to maximum of 4200mm x 1000mm x 1450mm, in any batch size from small to substantial.

PROFESSIONAL SERVICE

SPECIALIST EXPERTISE

FLEXIBLE SOLUTIONS

IPC has experience in...

a very wide variety of industries, but we have specialist expertise in the production of:

- Retail Displays
- Stands
- Brackets and Racking
- POS equipment
- Furniture

THE PROCESS...

Loading

Components are first suspended by jigs on an overhead track.

Pre-treatment

Three phase process ensures metal is clean and chemically primed.

Dry-off

Components are thoroughly dried in an oven before coating.

Spraying

Hand-sprayed by our skilled sprayers using state of the art guns.

Curing

Oven cured to create a highly durable high quality coating.

Quality control

Visual inspection on unloading to ensure good adhesion.

Packing

Assembled and packed to customer's requirements.

Transporting

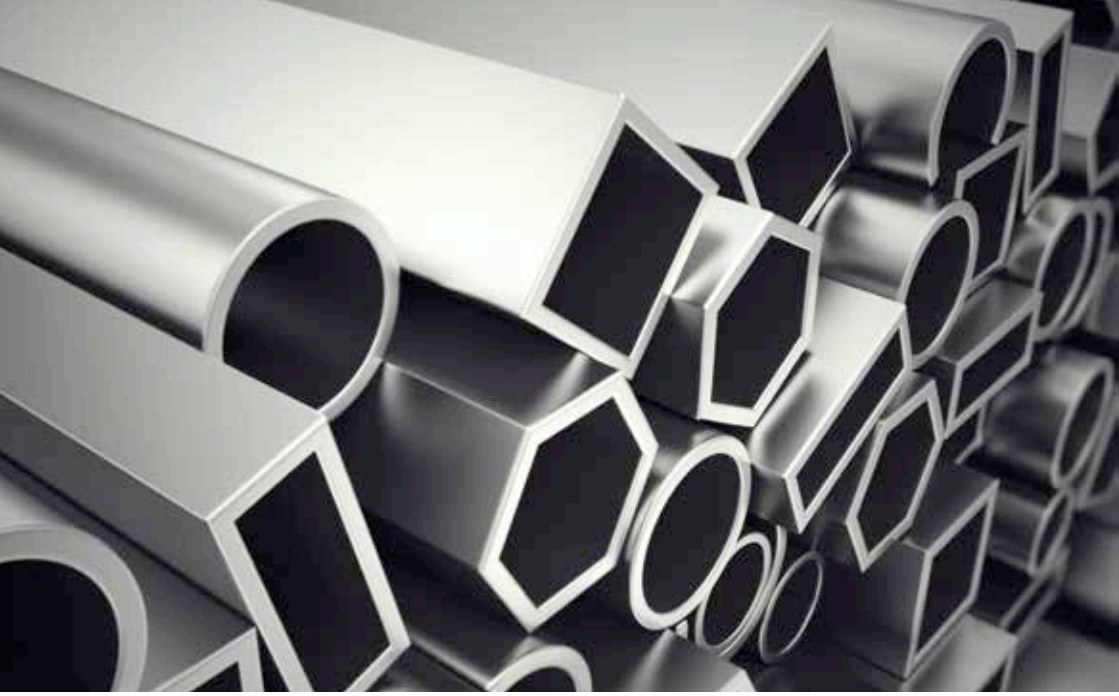

Delivery or collection from our factory.

POWDER COATING

Powder coating provides a high-quality, durable finish primarily to metal. It provides a more durable finish than liquid paints, while still providing an attractive finish in a myriad of colours and finishes.

- Creates a harder, heavier and more durable finish than painting.
- More environmentally friendly than most common paint processes.
- Easier to clean than paint, with better colour and gloss retention.
- More resistant to chemicals, ultraviolet light and temperature.
- Huge range of standard colours and almost any colour can be specially matched.
- Special finishes available such as antibacterial coatings.
